

Zachery Francis

Brooklyn, NY - 917-516-5474 - zacherywfrancis@gmail.com

Student at Brooklyn College (Minor: Computer Science) currently building a full desktop app in Java, React, and Tauri with an integrated local LLM. Comfortable across the stack from systems programming to React, with hands-on experience in IT support and teaching. Looking for a position where I can contribute and keep learning about tech.

Education

Brooklyn College

Bachelor of Science, Information Systems, Minor: Computer Science

Expected: December 2026

Kingsborough Community College

Associate of Liberal Arts

August 2021 – May 2023

Technical Skills

Languages: Java, C#, Python, JavaScript, Rust

Databases: SQL, MongoDB, PostgreSQL

Frameworks: React, React Tauri, Spark Java

Software: Adobe After Effects, Adobe Premiere, Adobe

Build & Dependency Tools: Maven, NPM, Cargo, Wix, Media Encoder, Sony Vegas Pro, Microsoft Excel

Professional Experience

Brooklyn College - *Teacher's Assistant, Computer Science Dept*

February 2026 – Current

- Evaluated and provided feedback on student programming assignments for 60+ students using TutorialsPoint: CodeLab, supporting learning outcomes in an introductory CS course

The Kitpak - *Logistics Associate*

August 2024 – May 2025

- Processed high-volume daily orders by accurately picking, packing, and labeling makeup and beauty products for timely shipment
- Coordinated international orders across Windows, macOS, and Shopify, ensuring accurate cross-border fulfillment
- Maintained inventory accuracy through systematic organization and restocking, reducing fulfillment errors

Kingsborough Community College - *IT Helpdesk*

August 2022 – May 2023

- Delivered technical support to a campus community of 20,000+ students and staff, resolving hardware and software issues under time pressure
- Diagnosed and resolved Microsoft Outlook configuration issues, improving email reliability for faculty and students

Projects

Calisigh *Desktop Calendar App* | marqed.it/Calisigh | [GitHub](#)

In Progress

- Built a fully customizable desktop calendar with React Tauri and Rust, featuring user-defined backgrounds and alert sounds; ships as a packaged Windows installer (v1.1.5) w/ Temurin 21 JDE available on GitHub
- Implemented multithreaded system alerts for reliable background notifications
- Integrated a local LLM handler via Ollama for on-device AI assistance with no external data transmission

Popular Vote *Full-Stack Web App* | [GitHub](#)

In Progress

- Live session platform where hosts share a room via link, QR code, or join code for real-time participant Q&A
- AI clusters and organizes participant questions so hosts can address themes rather than repeat similar answers
- Built with React, Node.js, and Supabase for real-time data sync

TimeRabbit *Java / Swing* | [GitHub](#)

2025

- First personal project; a Java Swing stopwatch with start, stop, and reset functions. Includes a shipped Windows installer (v1.1.5) available on GitHub
