

Zachery Francis

Brooklyn, NY - 917-615-5474 - zacherywfrancis@gmail.com

Information Systems & Business Management student at Brooklyn College (Minor: Computer Science) shipping desktop applications in Java, React, and Tauri with an integrated local LLM. Targeting SWE and IT/sysadmin roles where I can build and keep growing.

Education

Brooklyn College

Expected: December 2026

Bachelor of Science, Information Systems & Bachelor of Science, Business Management, Minor: Computer Science

Kingsborough Community College

August 2021 – May 2023

Associate of Liberal Arts

Technical Skills

Languages: Java, C#, JavaScript & Rust (Studying)

Databases: SQL, PostgreSQL (Learning)

Frameworks: React, React Tauri, Spark Java

Tools: Git, GitHub, VS Code

Build & Dependency: Maven, NPM, Cargo, Vite

Professional Experience

Brooklyn College - Teacher's Assistant, Computer Science Dept

February 2026 – Present

- Used TuringsCraft CodeLab to evaluate and debug Java programming assignments for 60+ students, identifying recurring misconceptions and adjusting feedback strategies until grade outcomes visibly improved across the class.
- Became a go-to resource students returned to voluntarily, indicating feedback was clear and actionable enough to build real understanding, not just surface-level corrections.

The Kitpak - Logistics Associate

August 2024 – May 2025

- Diagnosed a bottleneck in the fulfillment workflow and restructured the picking and packing process, resulting in noticeably faster order turnaround without sacrificing accuracy on high-volume days.
- Coordinated international orders across Windows, macOS, and Shopify, catching cross-platform discrepancies before they reached the shipment stage.

Kingsborough Community College - IT Helpdesk

August 2022 – May 2023

- Resolved 20–40 hardware and software support tickets daily for a 20,000+ person campus, consistently closing issues same-day to keep wait times and escalations low.
- Traced recurring Microsoft Outlook failures to a misconfiguration pattern affecting multiple users and applied a systematic fix, eliminating repeat tickets rather than patching issues one-by-one.

Projects

Calisigh Desktop Calendar App | marqed.it/Calisigh | GitHub

2026~

- Built a fully customizable desktop calendar with React Tauri and Rust, featuring user-defined backgrounds and alert sounds; ships as a packaged Windows installer (v1.1.5) with Temurin 21 JDE on GitHub.
- Implemented multithreaded system alerts and integrated a local LLM handler via Ollama for on-device AI assistance with zero external data transmission.

Popular Vote Full-Stack Web App | popularvote.marqed.it | marqed.it/PopularVote | GitHub

2026~

- Live session platform where hosts share a room via link, QR code, or join code for real-time participant Q&A; built with React, Node.js, and Supabase.
- Integrated AI clustering to organize participant questions by theme, reducing redundant answers and improving host efficiency during live sessions.

TimeRabbit Java / Swing | GitHub

2025

- Java Swing stopwatch with start, stop, and reset; ships as a packaged Windows installer (v1.1.5) available on GitHub
